#### **Governance & Collaboration**

Whole-of-government coordination mechanisms are fundamental to avoid divergences between sectoral priorities and policies while promoting mutually supporting actions across different sectors and institutions. Good governance and collaboration are vital components of effective policy delivery, especially in urban planning, which requires active coordination and engagement from so many different parts of government and stakeholder groups.

Vertical alignment between different tiers of government (eg National, Regional, Metropolitan, City and District) is essential, as is horizontal alignment and integration between ministries and departments (eg energy, housing, land-use, transport etc) and other partners. Organisational structures, processes and systems also need to support integration and alignment.
