

SDG-oriented urban project design: An opportunity for sustainable growth and investment

Experiences from the Global Future Cities Programme

What additional funding and financing options can be unlocked for realising urban planning and infrastructure projects that align with the Sustainable Development Goals (SDGs)? What opportunities does the UK Global Future Cities Programme's SDG Tool provide for accelerating SDG implementation in cities?

As part of the SDG Cities Global Conference, this Expert Group Meeting will open the space for urban actors to debate on current practices to effectively implement the SDGs in urban projects and discuss future opportunities that arise from SDG-oriented project design

Friday, 29 October 2021

12:00 - 13:45 (UTC)
